CAREER OBJECTIVE

Seeking an internship position to gain hands-on experience in web development and contribute to real-world projects. Aiming to strengthen foundational skills in front-end and back-end technologies in the short term, with the long-term goal of becoming a Senior Web Developer within the next 5–6 years, participating in large-scale global projects and advancing to a Lead Developer role.

EDUCATION

East Asia University of Technology (EAUT)

2022 - 2027

Information Technology

- Solid foundation in web development, including HTML, CSS, JavaScript, React, Node.js, and database systems.
- Experience working on academic and personal web projects, focusing on front-end and full-stack development.
- Strong understanding of software engineering principles, data structures, algorithms, and system design.
- Active participation in team projects and coursework related to modern web technologies.

TECHNICAL SKILLS

Programming Languages:

- JavaScript
- Python (basic)
- Java (basic)
- C/C++ (basic)
- TypeScript (basic)

Web Development

- React, Node.js: 4 freelance projects

Database Management

- SQL Server, MongoDB: 2 semesters, 1 project

Version Control

- Git, GitHub: 1 year of experience

PROJECT EXPERIENCE

1. Books Manager | Personal Project

Tech: JavaScript, HTML, CSS

GitHub: <https://github.com/atdav3/books-manager>

Description:

A web-based system for managing a book list, including adding, editing, deleting, and searching book information.

Responsibilities:

- Built the UI layout using HTML/CSS
- Implemented CRUD functions with JavaScript
- Handled data validation and interactive features

2. Weather App | University Project

Tech: Java, Android Studio, OpenWeather API

GitHub: <https://github.com/atdav3/Weather-App>

Description:

A mobile weather application that displays real-time weather data, forecasts, and location-based updates using external APIs.

Responsibilities:

- Integrated the OpenWeather API to retrieve live weather data

- Developed UI components and dynamic weather display
- Implemented location tracking and multi-day forecast features

3. Homestay Manager | Personal Project

Tech: JavaScript, HTML, CSS

GitHub: <https://github.com/atdav3/homestay-manager>

Description:

A homestay management interface designed to handle room listings, customer bookings, and basic management tasks.

Responsibilities:

- Created user interface for room and customer management
- Built core features such as data input, update, and filtering
- Organized project structure for maintainability and future expansion
